At Floyd Lee Locums, what we do impacts lives. Whether it's a patient, their families, or providing active medical staff some time away, our goal is to place the best locum clinicians in facilities where they are needed. Our concierge service in the healthcare staffing industry means that we provide clinicians with the best experience possible. Whether pre-filling an internal application or tracking down documents our MSO client partners need, we go above the normal process. We walk with our clinicians from beginning to end. Our role as an MSP is incredibly rewarding because it allows us to touch people's lives throughout communities – far and wide. Locum staffing is at the heart of what we do.
